Marty-

I'm not familiar with what agreements were made upon ordering ASPECT or how R8 normally does the contracting for its use. Would you like me to forward to our FSC to follow up on?

Martin,

I know it's not high on the priority list now but I have attached the SOW and IGCE for the flight services contractor. It assumes three days for the response support. Five flight hours per day, ~\$34K. Let me know if you would like to change anything or if there is someone else I need to work with on this stuff.
